It has a minimalist design that makes it easy to navigate. You can start and stop the stopwatch or timer clock countdown without having to open the app. CC BY-SA 2.0/Ritesh Man Tamrakar/Flickr Tabata Stopwatch Pro (Android, iOS) Tabata Stopwatch Pro was designed with HIIT in mind. Pin the stopwatch tile right on the home screen for quick and easy access. The display has several circles on the main screen that you can customize to different timers and stopwatches. CC0/yellowcat/Pixabay Timer (Android) Timer has a clean, simple look and is easy to use. Kaspersky is a good program. You can customize the look of the app and rename the different timers to meet your needs. CC0/LouAnnClark/Pixabay MORE FROM QUESTIONSANSWERED.NET Get all our best iOS security under one account Kaspersky Security Cloud comes with premium apps designed to work beautifully on your iPhones and iPads. Don't let them fool you, they are now and have been aware of the WiFi Connectivity issues for a very long time and have failed to do anything about them on a company wide scale!!! It's completely reprehensible that they can charge so much money for a subpar product that causes you to want nothing more than to delete it from your phone as quickly as possible and get a refund! Getting ahold of them for real assistance is about as easy as trying to climb Mt Everest with two broken legs, thus the refund request! (Complain here, they begin the long process of their so-called help.) If you don't mind having your phone lose its Wifi connection every time you're not actively using it for 30 seconds or more, then go ahead and see how bad the other services are in the phone package. BUT...if you want to save yourself from a tremendous amount of aggravation, look at the competition! "The Russians Are Calling, The Russians Are Calling," and they say run as fast as you can from Kaspersky! I'm deleting and taking the loss (ouchs). I can't take it anymore! Dear customer, Please submit a ticket with your suggestion to our Tech Support via My Kaspersky: log in at and click "Submit Request". I am considering switching to a different program when my subscription finishes. My computer. It displays the time intervals in digital or analog format, recording minutes, seconds and milliseconds. Stopwatch applications are available as standard programs on many smartphone devices. With the stopwatch feature, the time counts up so you can time your workout. Security from phishing attempts Anti-Phishing warns you about dangerous links you try to open in emails, IMs and on websites. Those who want more features can upgrade to the paid version. The basic app is free and offers a quality, reliable stopwatch, but the paid version unlocks other features. This app is optimized for use with Apple Watch, making it easy to use during exercise. CC0/fancycrave1/Pixabay Intervals (iOS) Intervals is a timer designed specifically for interval workouts. Giving you protection that keeps up with your busy routine. It's your ingenious security solution, under one account. Additionally, set single-use and repeat timers for other activities. CC0/stevepb/Pixabay Stopwatch Timer for Android is designed for one-handed operation, so you can easily control it during a workout or other activities. The following data may be used to track you across apps and websites owned by other companies: Identifiers Usage Data Other Data The following data may be collected and linked to your identity: Purchases Contact Info Identifiers Usage Data Diagnostics Other Data The following data may be collected but it is not linked to your identity: Privacy practices may vary, for example, based on the features you use or your age. From essentials like password management to innovative new features including a tool that helps you stay in control of your private account data, everything's designed to make your life easier and more secure. All of which I had already for free so they're not useful to me. I checked in today after noticing I don't get notifications anymore only to see that I had some free version (Kaspersky Security Cloud) that doesn't even scan my device. Choose where you want to connect from today! We've added cities to our server locations We continue to broaden our server coverage, and this now includes individual cities for the first time. Other features include voice controls and pairing with the Health app. CC0/charlie0111/Pixabay Stopwatch and Timer (Android) Stopwatch and Timer for Android has been one of the top timer apps since 2001! It performs basic functions without a lot of extra features. Unlike the above-mentioned app, you control this app using your Apple Watch, though it runs simultaneously on your iPhone. Hello! Please contact our support by writing to mobile.support@kaspersky.com. Simply start the stopwatch and click the "lap" button to record your lap times. I used to be able to scan for viruses on my iPhone and it'd tell me when I was jeopardizing my security or anything. I did try to put it back to make sure I wasn't doing something wrong but I see that Total Security is no longer even an option for iPhone anymore. The developer, Kaspersky Lab Switzerland GmbH, indicated that the app's privacy practices may include handling of data as described below. You get to choose the color and sound themes to customize the app to your preferences. Helping you ensure scammers don't steal your Apple ID and access your device data. Cloud means performance Our cloud-based service works off your mobile devices to make sure they run fast and perform well. Plus you get personalized alerts and new security sent straight to your devices. One of its top features is the widget, which you can place right on your home screen. It has a basic setup for people who are new to HIIT training, but is customizable for more advanced athletes with specific workout needs. CC0/tacofleur/Pixabay Google Clock (Android) Google Clock is perhaps the easiest stopwatch to use on Android devices. Because the app was developed by Google, you can feel confident knowing that it will work seamlessly with smartwatch devices, too. CC0/stocksnap/Pixabay Stopwatch Timer (Windows) Stopwatch Timer for Windows devices is an easy-to-use stopwatch app with a minimalist design. They will help you set everything up and explain how everything works. Giving you more accuracy than ever in choosing which locations you want to connect to! Ok so, I was in Instagram, and it tells me that I've two viruses from adult sites, but I'm a child, so it pretty obvious I didn't watch that type of stuff, I didn't believe it but I still got worried so I downloaded this app, I would like for the creator to explain if this app can help me with my problem, and if it can protect my phone, accounts, emails, passwords, etc from getting a virus or getting hacked I paid for Kaspersky Total Security for 3 devices, but it really only protects one device. The app allows you to store data to refer to later or send as a file through email, text or social networking. CC0/27707/Pixabay Multitimer (iOS) Multitimer is a step up from the basic countdown timer clock and stopwatch on the iPhone. Click to sign up! Owing to legal restrictions on the use of a Virtual Private Network (VPN), Kaspersky Secure Connection cannot be installed in Belarus, China, Saudi Arabia, Iran, Oman, Pakistan and Qatar. Privacy Policy: of usage: Dec 16, 2021 Version 2.49.0 We've added servers in the following most-requested locations: Kazakhstan, Portugal, Slovakia. However, those looking for an easy-to-use stopwatch app that is a step above the basic offering should check out these 10 picks. Timeglass
